

TIMED AUCTION

OPENS: 08:00, 21 MAY 2026 | CLOSING: 18:00, 25 MAY 2026

To the managers and
personel of Standard Bank,

Over the years, Valley Venture Stud has grown through hard work, passion, commitment, and the support of people and businesses who believed in the journey alongside us. I would like to sincerely thank Standard Bank for being part of that journey for so many years.

Your continued support and partnership have been deeply valued and appreciated. In an industry where long-term relationships matter, it means a great deal to work with a partner that has consistently stood beside us through the years.

The success and growth of Valley Venture Stud would not have been possible without the support structures and partnerships that helped make it all achievable, and Standard Bank has certainly been one of them.

Thank you for your professionalism, your loyalty, and for being a trusted partner throughout the years. It is a relationship I value greatly, and one I am truly grateful for.

With sincere appreciation,

Tina de Jager

Embedded traits being a strong build, 18 2/8" horn length, body shape & form and excellent masculinity make this Tortilis-bred ram an intelligent choice. Tjol Lategan, along with Ryk van Schoor, formed one of the great post-war centre partnerships in rugby. Capped eleven times, debuting against the 1949 touring New Zealand side. Later selected for the 1951 - 52 tour of Great Britain, Ireland and France. A team seen as one of the greatest ever, winning 30 of 31 matches.

BenguFarm MOBILE App

BenguFarm Mobile has recently been released as an Android app. This app enables game farmers to capture animal data on a smartphone or tablet with an Android operating system and to synchronise it with the BenguFarm-GAME data on the breeder's computer.

Data on the breeder's BenguFarmGAME can be sent from his computer to BenguFarm-MOBILE on a smart phone or tablet. This data can then be viewed on the smartphone or tablet when moving around between the animals in the veld.

Basic animal data of new animals (calves/lambs born and animals purchased) can be recorded in the veld on BenguFarm-MOBILE.

General notes and all data recorded at darting of animals can also be recorded on BenguFarm-MOBILE. This data includes horn measurements, photos, camp movements, inoculations & dosing, microchip implants, DNA samples, pregnancy tests (females), fertility tests (males), internal parasites, illnesses & injuries, treatments, veterinary notes and weights.

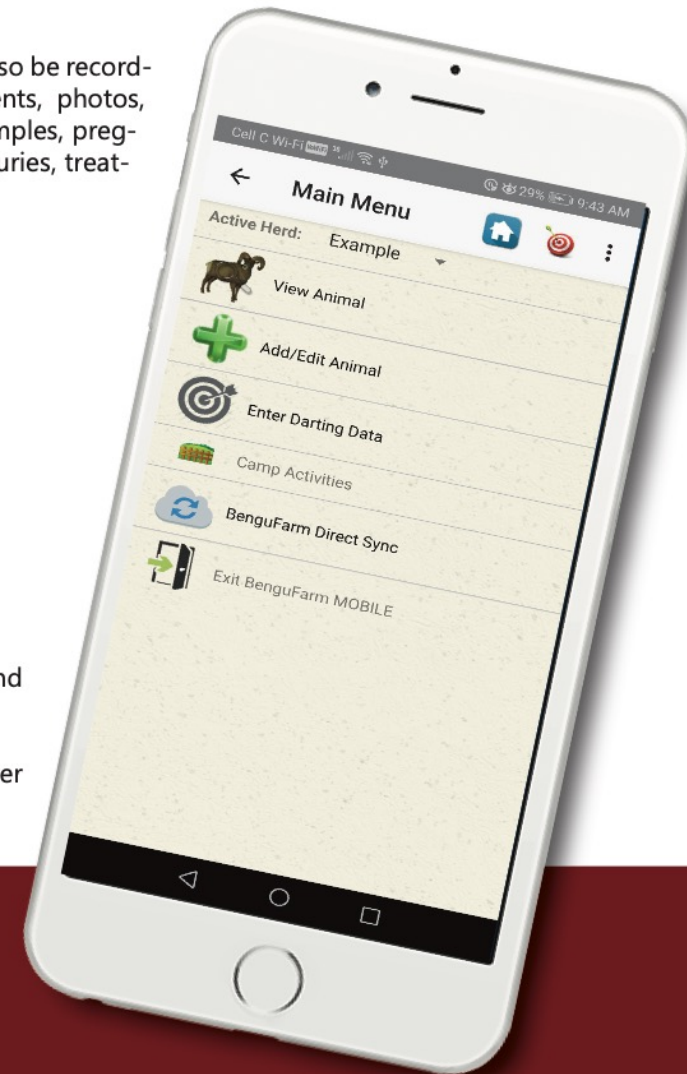

The recording of data on BenguFarm-MOBILE in the veld does not need Internet access.

BenguFarm™ GAME is a module of

BenguFarm™

ADVANCED LIVESTOCK MANAGEMENT SOFTWARE

BEEF • GAME • SHEEP • GOATS • PIGS • GENETICS

The program can be set up in both **English and Afrikaans** and is easy to use, with the help of a **user-friendly manual** and step-by-step help function on most windows.

Support and training are readily available through our network of agents and is done by phone, e-mail and using Teamviewer remote support software.

The programme **caters for 45 game species**. Subspecies, families/bloodlines and colour variants (including "splits") can also be recorded. BenguFarm GAME provides for **extensive data verification** to ensure that data is recorded correctly.

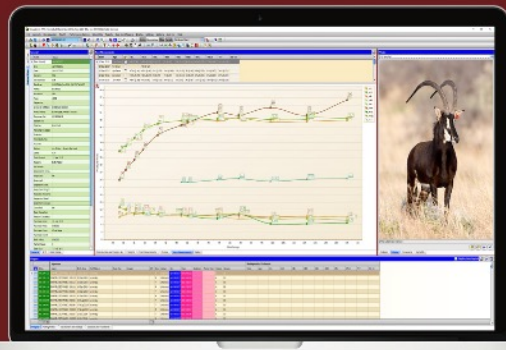

Special Features:

BenguFarm GAME automatically indicates fertility of females from **various reproduction calculations**, such as: age at first calving, inter-calving periods, days since last calving and expected calving dates. **Horn growth per month** is also calculated. These up-to-date scientific results enable breeders to use various **age corrected horn measurements and horn growth indices** for easy comparison and accurate selection of animals. Using pedigrees records, high levels of inbreeding can easily be avoided, as **inbreeding coefficients are estimated** for all animals, including progeny of planned matings.

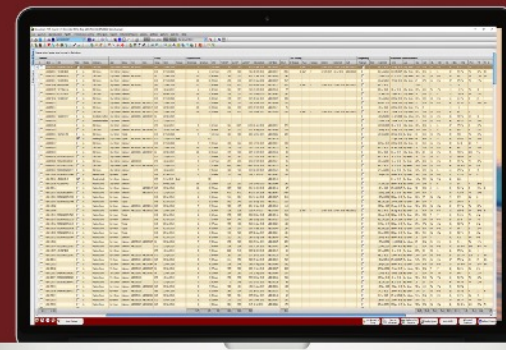

A very important aspect of game breeding (and buyer's peace of mind) is the **DNA certification of parents and bloodlines**. Parentage and bloodlines are determined by DNA analysis, using hair or other biological samples, at laboratories such as UniStel. DNA reference numbers and all certification information, such as bloodline analysis method (**nuclear or mitochondrial DNA**), issued by these laboratories are captured by BenguFarm GAME. Certified animals and parents are **identified and marked with a symbol** in all BenguFarm GAME windows and reports.

For the main window of BenguFarm GAME there are two options:

In the **Animal View**, basically all the information of an animal can be viewed, from general information, pedigrees, horn measurements and photos to health, progeny, including progeny averages through **18 interchangeable sub-windows**.

The **Herd View** lists all the animals with their most important data. Data can be **highlighted according to criteria** specified by the user to easily identify animals with traits meeting said criteria. On this view, **data can be sorted, filtered and grouped**. For example: grouping data by sire or by camp.

The **views are customizable** with the user able to switch off data he or she does not wish to see.
